

FLOWER CROWNS

Supplies:

- Any wildflowers you can find (dandelions work as well!) with a long soft stem
- Scissors (optional)

Instructions:

1. Once you have collected your flowers, grab one to start the chain with.
2. Next, grab a second and loop it around the first stem tying it into a knot.
3. Push the knot up to the bulb of the first flower.
4. Repeat steps 2 and three starting on the new stem each time until you have chain long enough to fit around your head.
5. Knot the two ends together and you have your own flower crown!
